

# FEDERAL AVIATION ADMINISTRATION

## Broad Information Technology Services II

DTFAWA-03-D-03033

## Program Management

Effective project management is key to the success of any venture. **Network Designs** ensures that all contractual obligations are successfully implemented and managed throughout the life of each contract. We provide the highest quality work to the Federal Government.

**Network Designs** provides strong program management to coordinate efforts between Network Designs, our Solutions Team Partners, and the Federal Aviation Administration. We ensure that the necessary resources (tools, equipment, qualified personnel, supplies) are available when needed to respond to a task order. We provide the capabilities to access the resources expediently, project resource requirements, maintain inventories of critical or frequently used resources, and track resources required and deployed.

Under BITS II, we provide—

- Procurement Support
- Program Administration & Management
- Business Operations

## Team Communications

**Network Designs** has created [www.BITSII.com](http://www.BITSII.com), a technology-rich, secure information portal that anticipates the dynamic nature of a project's evolution. This portal has been customized exclusively for the BITS II Program Office and Task Order Clients. This online management tool provides BITSII procedures, contract and task status, monthly reports, and more. BITSII.com –

- Provides an excellent mode of communication to foster a strong partnership with government agencies
- Facilitates daily project management and communication among all team members
- Enables performance progress to be captured daily
